

## How to connect your personally owned devices to district wifi

1. THIS IS FOR YOUR PERSONALLY OWNED DEVICES ONLY. DO NOT FOLLOW THESE INSTRUCTIONS ON DISTRICT OWNED DEVICES.
2. Connect to AISD-BYOD. No password or key is required.

3. Open a browser and go to [www.aledoisd.org](http://www.aledoisd.org), which will redirect you to the sign on page. **\*\*TIP:** If you are **NOT** redirected to the screen below, try browsing to a random site you do not visit regularly. (ie. [espn.com](http://espn.com), [cnn.com](http://cnn.com))

4. Enter your domain credentials to sign on. This is the same username and password used to log into a district computer.
5. You are now connected and can begin using the internet.  
**\*\*Tip:** You will stay connected to AISD-BYOD to continue browsing.  
(It may take about 60 seconds for the device to be able to browse the internet after you log in successfully.)

**Success**

You now have Internet access through this network.
